COMPUTER ENGINEERING / FLUTTER DEVELOPER

I was born on October 3, 2000 in Izmir, Turkey. I completed my 4th year in Computer Engineering at Mersin University. I am interested in mobile application development, robotics development, artificial intelligence and machine learning. Thanks to the internships I completed and my school, I took part in many projects where I undertook both Front-End and Back-End tasks. I am more in the foreground in the Front-End part, I am improving myself with FireBase for Back-End for now. I have B2 Intermediate level English. I have an A2 driver's license.

COMPETENCIES

Flutter / Dart	Artificial Intelligence	Python
Robotics / IOT	Machine Learning	React
Electronics	FireBase	Data Analysis

PROFESSIONAL EXPERIENCES

Artı ve Artı Technology Services Industry and Trade Inc.   **July 2024 - August 2024**
Flutter Developer - Intern Computer Engineer - Cybersecurity Department
I was tasked with developing a cybersecurity training/assistance application. I delivered an app that features user authentication managed with Firebase Authentication, photos and data securely stored with Firestore and Storage, slides, quizzes, a ranking system, and AI integration to make learning enjoyable. Additionally, users can seek help from professionals available on the platform whenever needed.

Sim Information Technologies | AKINSOFT Mersin Regional Dealer   **July 2023 - August 2023**
Flutter Developer - Intern Computer Engineer - ERP/CRM Development
When I started my internship, it coincided with the company's preparation to launch a new project. This project involved developing an ERP (Enterprise Resource Planning) application for a group of managers overseeing a fleet of vehicles within the company. In the Flutter-based application, managers and employees use separate login methods, and a wide range of features like vehicle tracking, employee tracking, income and expense tracking, location tracking, requests, and more can be viewed with a single touch.

Chain and Boutique Coffee Companies   **June 2021 - September 2023**
Barista
During my student life, I worked as a barista in many chain coffee companies and boutique cafes in order to make pocket money for myself. For example, Sabiha Gokcen Airport International Department Starbucks, Sayapark Soulmate... I have a total of more than a year of experience in baristas

EDUCATION

Computer Engineering - Mersin University
2019- Continuing (Single Course Left)

Fen Bilimleri High School - Istanbul
2014 - 2018

PROJECTS

Cybersecurity Education / Outreach App
Flutter - OpenAI API - Firebase - Authentication

AI Supported Logistics Tracking Application
Flutter - OpenAI API - Firebase - Authentication

Smart Pet Tracking Collar with App
ESP32 - Flutter - Firebase - IOT - Google Cloud API

E-Commerce Website
.NET - Firebase

ML Body Detection/Distance Measurement
Python - OpenCV - Collab - Machine Learning

Personal Website
React JS - Netlify
